INTERNATIONAL SPEAKER SERIES 2015-18

International Eco Commerce Partnership (IECP)

Invitation

We are seeking Corporate Sponsors to help us to fulfill our vision for the International [Eco Commerce Partnership \(IECP\) 2015-18](#). Your support makes it possible for us to expand our initiative to include educational live Speaker Series at World Trade Center Atlanta (WTCA).

The first development stage, 2009-14, has been privately funded by the Eco Commerce Exchange (ECE). Through the expansion of the IECP initiative, we will achieve the reach and scale to support our existing stakeholders, and the opening of an Eco Commerce Exchange (ECE) in Atlanta and an Online Learning Center.

Businesses and Organizations wishing to position themselves as our Lead Sponsor have many opportunities within the **Eco Commerce Exchange (ECE) and Online Learning Center**. Creative branding within our community will allow our Sponsors to gain access to a highly targeted audience of over two million motivated Business Leaders in a non-evasive format. Live and online forums will give our valued Sponsors further opportunities and exposure. Our sponsors will be invited to discuss critical issues and topics, and to educate our audience on how they are contributing to IECP initiative. In short this is a unique channel to communicate your message for maximum exposure and impact.

To contribute constructively to communication and collaboration, ECE has developed an online Auditorium and Learning Center. We deliver our Speakers, Information and Training via www.EcoCommerceExchange.org platform engaging individuals, enterprises and organizations seeking to learn about, or to join the IECP initiative.

Our model is designed to create shared value to all stakeholders, enable community projects, and provide fast and easy access to new critical information and contacts, and to all Eco Commerce Exchange (ECE) online Learning Center participants at no cost.

The Eco Commerce Exchange (ECE) is truly a pathfinder in new collaboration, a new model and solution for affinity communication, collaborative learning, and action. We can effectively apply this model and systematic process in any community. The portal achieves efficiency and scale in bringing those seeking to learn and connect with those who provide innovative solutions. This community platform serves the communication needs of our international B2B community in the state of Georgia, and elsewhere.

Please contact Ms. Tana Torrano, Tana@OSBO to discuss your role in helping us to fulfill our vision for the IECP Initiative 2015-18.

Save the date: May 5-6, 2015
